

**Manuel Pérez-Donsión** received his MSc in Industrial Engineering from Catalanian Politechnical University (UPC) in 1980 and his PhD from Vigo University in 1986. In 1987 he became a Full Professor.

Among other academic posts he was the Dean of the Escuela Técnica Superior de Ingenieros Industriales y Minas from 1995 to 2001. From 2001 till to 2004 he was also the Head of Electrical Engineering Department. He is member of the International Steering Committee of ICEM and member of the Scientific Committee of different conferences, congress and reviews. He is President of the following associations: “European Association for the Development of Renewable Energies, Environment and Power Quality (EA4EPQ)”, “European Association for the Development of Electrical Engineering (EADEE)” and “Spanish Association for the Development of Electrical

Engineering (AEDIE)”, Vice-President of the “Portuguese Association for the Development of Electrical Engineering (APDEE)”. He has obtained the Gold Insignia of the “Green Week Foundation”. Gold Medal of the Faculty of Industrial Engineering of Vigo University and four awards of “Electrical Engineering” review. His main research interests are linked to the:

- Power Quality
- Renewable Energy with special emphasis in Small Hydro Power and Wind Energy.
- Electrical Machines Modelling, Diagnostics and Control
- Permanent Magnet Synchronous Motors
- Transient Stability of Electrical Power Systems.

He was the author of two research books and other four books, more than one hundred research papers some of which were presented at national and international conferences, and others were published in relevant reviews and journals. He has also been involved with several research projects. The last years he has had lectures about Quality and Utilization of Electrical Energy and Control of Electrical Motors for undergraduate students and Special Electrical Motors, Renewable Energies and Power Quality for postgraduate student.
